

## Sheets & Liners

Aalmir Plastic Industries offers a full line of plastic sheet products that are appropriate for a number of industrial applications. Our Strength lies in our ability to evaluate customer requirements and offer sheets that best fit their application.

The cutting and forming department is in charge creating the most complex of designs; sheeting, coating, die-cutting, hole punching, rewinding/splitting and custom packaging to fit customer specifications. For specialized customers that require specialty polymers beyond our standard range of products, we offer speedy and efficient sourcing services. With the help of our international network of raw material suppliers, we are able to source any specific required material and then automatically integrate it with our customers manufacturing process, thus reducing time, quality and incompatibility issues for our manufacturing customers and resale customers.

Applications that may benefit from using our sheets are Floor-lining applications, Engineering applications, Aerospace applications, Marine applications, Construction applications, Agricultural applications, Packaging applications, Industrial applications and Skylight fabrication. Our sheets come in various sizes and are very competitively priced whilst retaining benchmarking quality levels. Commodity Polymer Sheets

Polyvinyl Chloride (PVC) Sheets

Polystyrene Sheets (PS) & Liners

HDPE & LDPE Sheets & Liners

Polycarbonate (PC) Sheets

Polyolefin Sheets

Synthetic Paper

Acrylic Sheets

Nylon sheets

ABS Sheets

Engineering Thermoplastic Sheets Ethylene-chlorotrifluoroethylene (ECTFE)

Polyvinylidene Fluoride (PVDF)

Polyetheretherketone (PEEK)

Polymethylpentene (PMP)

Polyethersulfone (PES)

Polyetherimide (PEI)

Polysulfone (PSO) Please Contact us directly for technical specification and sizes.
