

## Flexible Packaging (Film)

Aalmir Plastic Industries manufactures both printed & unprinted plastic film and bags. Our bags are made under a strict supervisory production model that allows us to eliminate production errors such as thickness variation, uneven length, sealing mishaps and printing problems. Applications can fit any type of packaging and labeling needs. We offer an extensive assortment of plastic raw materials and additives to suit each and every particular need separately.

### Printing Capabilities

Our printing department is equipped with high quality ultra-high-speed offset & flexographic machines that can meet the toughest printing requirements in the shortest time. As an added feature, the in-house Printing lab is able to accurately color match your desired colors and even design your template for you thus eliminating the cost of outsourcing template/block production.

### Sealing & Cutting Capabilities

Aalmir Plastic Industries Sealing and cutting department has the capability to produce bags and liners of many sizes and sealing methods. We also supply custom plastic rolls, perforated bags, Pallet covers, shrink sleeves, pouches and many more....
